Exporting a Zone Map
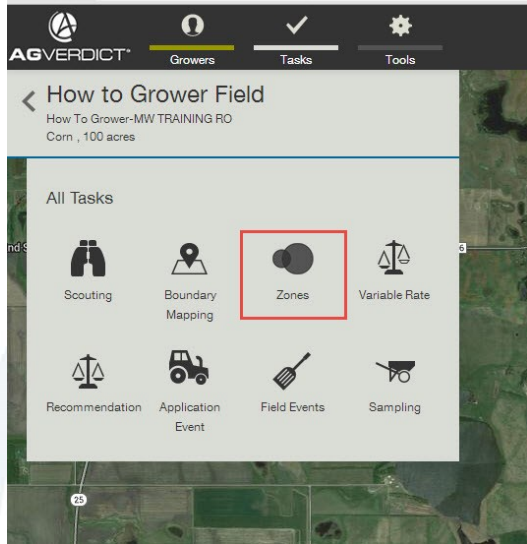

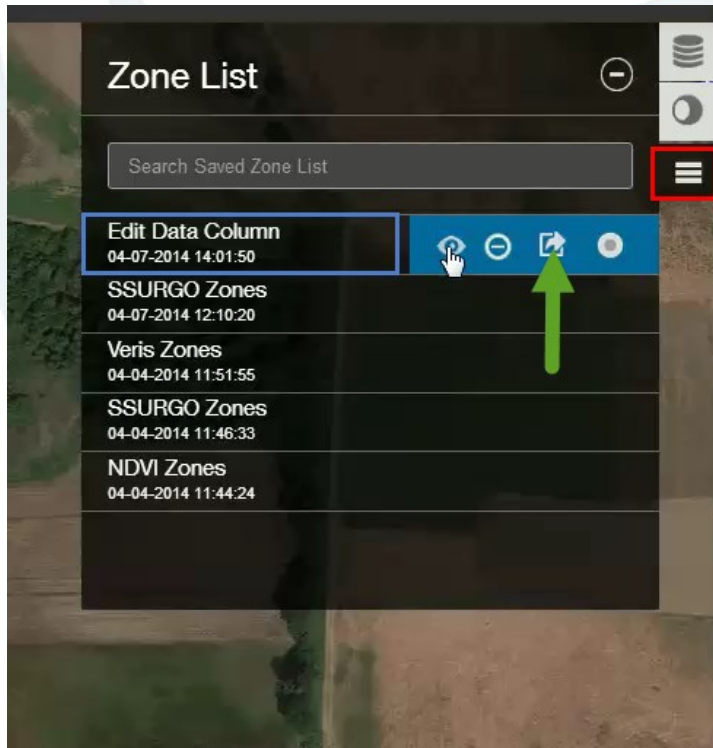

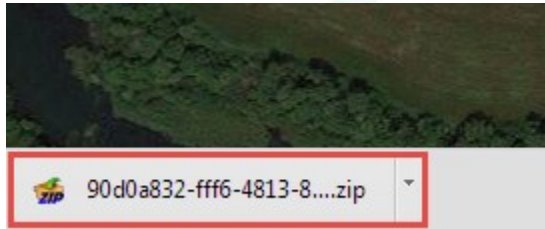

1. Find your previously generated zones by selecting the Zones icon.

2. On the right hand side, select the icon with 3 horizontal lines, the Zone List. From there, hover over the right side of the Zone Layer you wish to edit, and click the Export icon.

3. In the bottom left corner of your screen, the Zip File will appear, ready to be saved.

4. Click the Drop Down Tab to the right of the file, and select Show in Folder.

5. At this point, the file will be automatically saved into Downloads. From here, you can access it as an attachment for emails or to open and view. By Right Clicking the file, you can Rename the file. By Clicking and Holding, you can drag the file into another folder.
